

ASSIGNMENT-13

Problem Statement: Create a Workmail for your Profile.

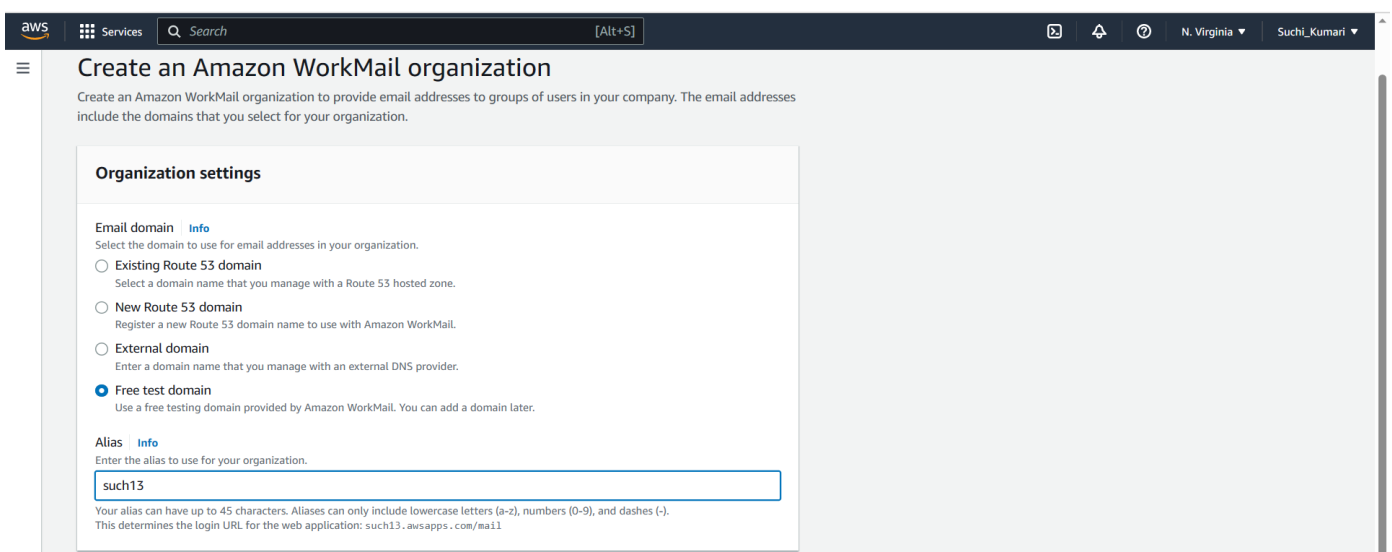

1. Sign-in to your AWS console. Change your region to N. Virginia from the dropdown on the left-side of the username in the top bar of the console homepage. Then search for workmail. Select the AWS workmail option.

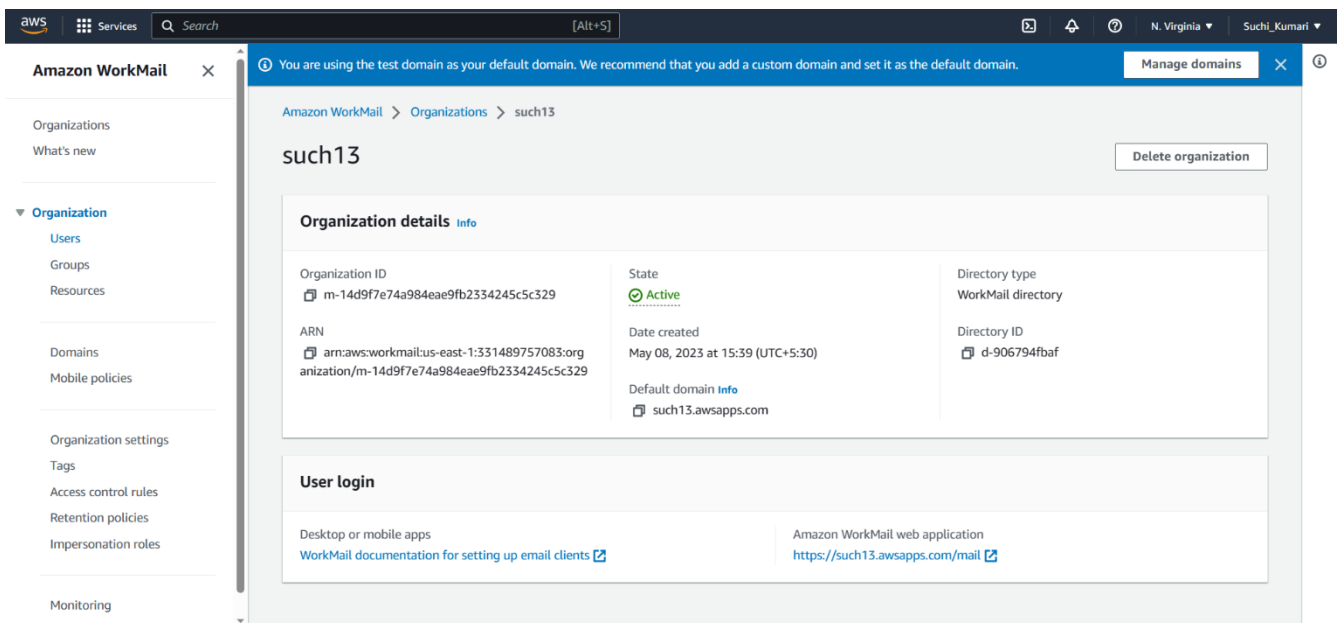

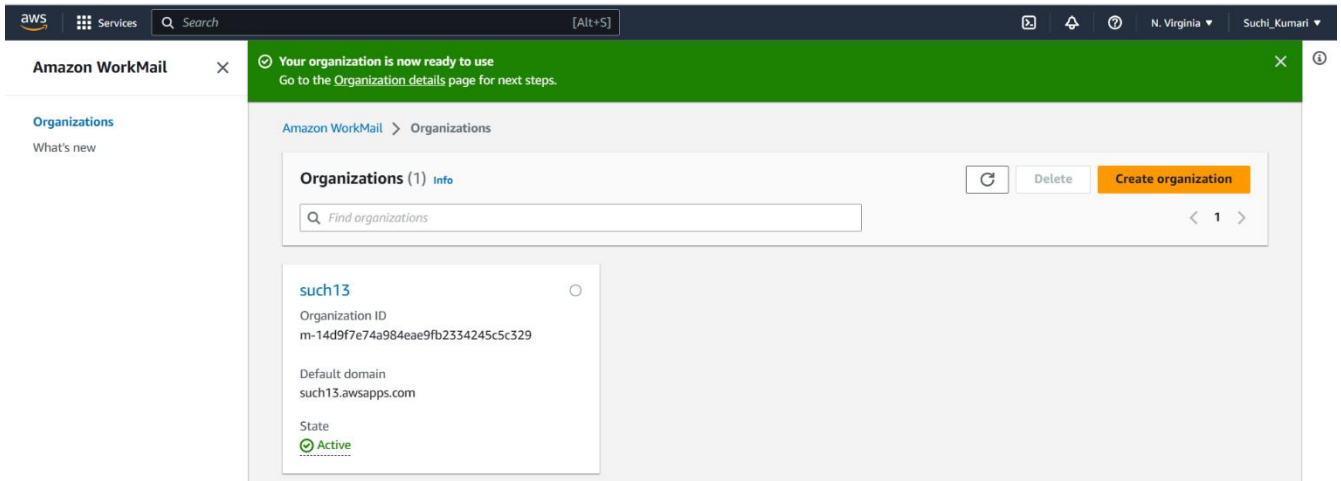

2. Then click on the create organization button.

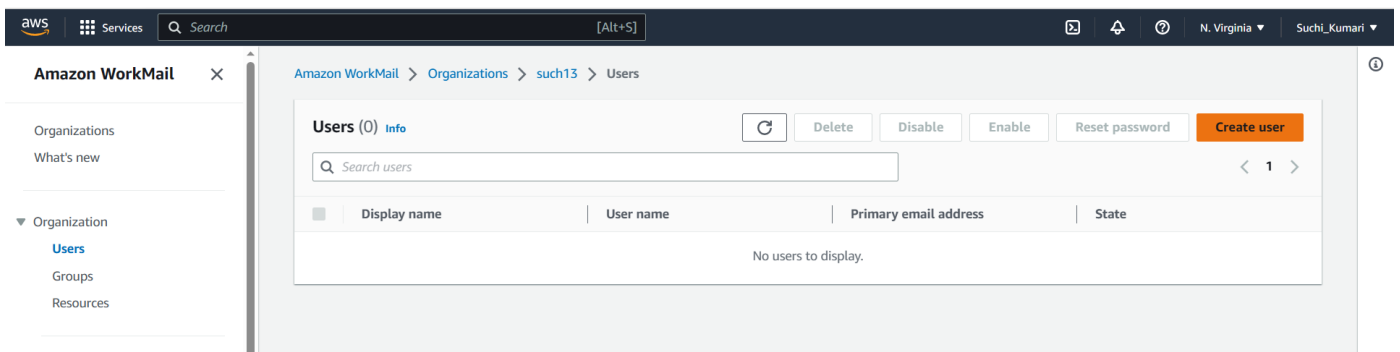

3. Then in Organization settings under Email domain select Free test domain. Then give the organization name/ alias. Then click on create organization button.

4. After waiting the organization will become active. Now click on the organization name

5. Now go to the Users section under Organization tab on the left side nav bar. Then click on the create user button.

6. Then enter User name then enter first and last name then enter Display name.

aws Services Search [Alt+S]

Amazon WorkMail > Organizations > such13 > Users > Create user

Create a user [Info](#)

Add a user to your Amazon WorkMail organization.

User details

User name
The user name enables the user to login to the Amazon WorkMail webmail.

 User name can only contain the following characters: a-z, A-Z, 0-9, _ (underscore), - (hyphen) and @.

First name - optional

Last name - optional

Display name
The name by which the user is presented in the system.

7. Then provide the password. Next click on the Create User button.

Email setup

Email address
Primary email address to be used for this user.
 @

Password
Password for the user to log in with.

 Passwords have an 8-character minimum with at least one character from three of these four categories: lowercase, uppercase, numeric, and special characters.

Repeat password

Cancel [Create user](#)

8. After the user is created return back to your organization page using the following link.

aws Services Search [Alt+S] N. Virginia Suchi_Kumari

12. Now let's test our mail server by seeing whether it can send and receive mail. Send some mail to your Gmail from this by creating a mail using the new item option. Select new email. Now write an email to your Gmail address.

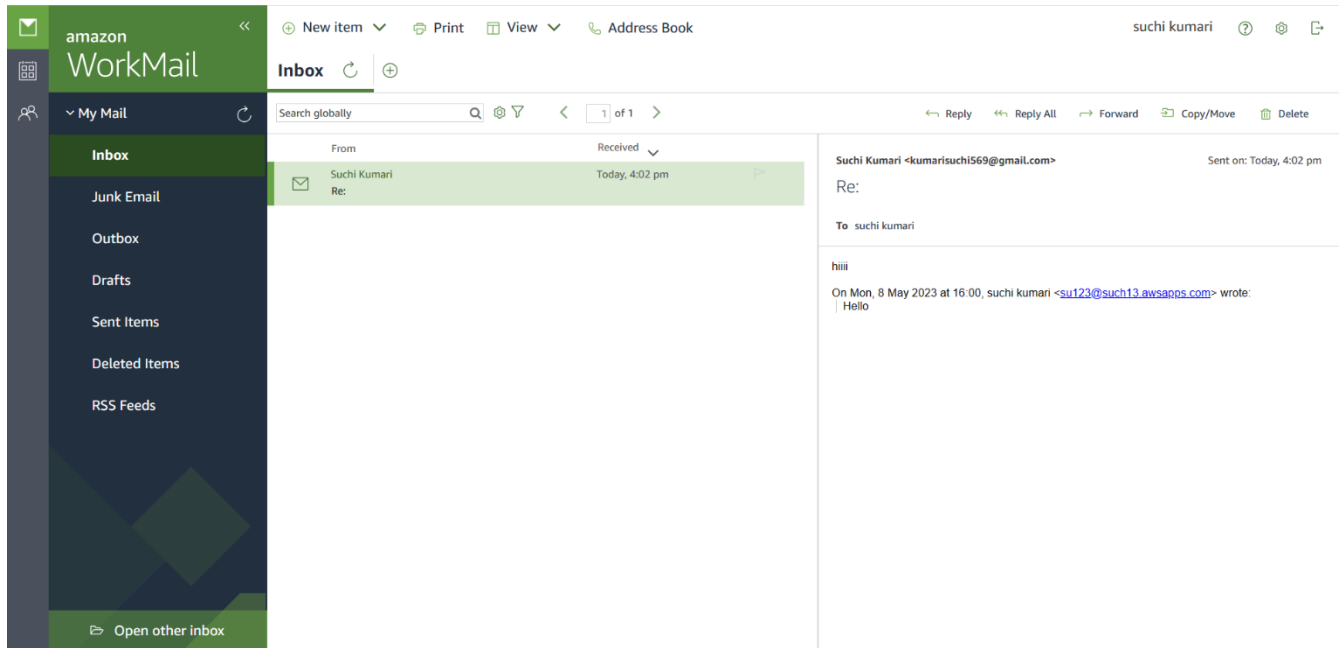

13. Then check your Gmail. We received it.

14. Now send something back to the workmail. Check your workmail if you have received the mail. It should be in inbox.

We have successfully received a mail.

Hence our mail is working perfectly fine.

We have successfully created a workmail for our profile
